SUMMARY

Product Manager with 7+ years of experience delivering enterprise SaaS, self-service, and digital support platforms across healthcare and retail. Skilled in **end-to-end product lifecycle management**, stakeholder alignment, and digital transformation. Proven ability to build secure, scalable, and data-driven solutions—leveraging technologies such as CRM integrations, analytics, and **generative AI to enhance customer engagement and operational efficiency**.

EXPERIENCE

Senior Product Manager

GE HealthCare

Jul '21 — Present

Bengaluru

Leading global product initiatives to transform digital customer support, self-service, and engagement platforms using scalable SaaS and AI-driven solutions.

- Owned **end-to-end product lifecycle** for a global customer support portal (non-login + QR-based access), improving accessibility for 35,000+ users and reducing call center volume by **30%**.
- Led **global rollout of a conversational AI-powered SaaS chatbot**, integrating with **Marketo** and internal CRM systems to capture and route **XXK+ sales-qualified leads**, resulting in **\$XXM+ digitally initiated revenue**.
- Owned **configuration and optimization of a generative AI-based customer assistant**, defining **Rules of Engagement** and regional **prompt flows** tailored to pre- and post-purchase journeys; collaborated with marketing, legal, and UX to ensure brand alignment, campaign accuracy, and compliance.
- Collaborated with **engineering, QA, and UX** to translate product requirements into secure, scalable platform features aligned with CI/CD and architectural standards.
- Built **custom dashboards** for vendor performance and SLA tracking, reducing manual reporting time by **70%** and ran **customer journey analytics** and **A/B testing**, increasing CSAT from **45% to 77%**.
- Partnered with InfoSec and compliance teams to implement **data privacy guardrails** and **role-based access controls**.
- Selected for GE's prestigious **Digital Technology Leadership Program (DTLP)**, a 2-year rotational leadership initiative.

Android Developer

Publicis Sapient

Jun '16 — May '19

Gurugram

Delivered high-performance Android apps and features for global QSR clients, contributing to digital transformation and improved customer experiences.

- Developed and delivered core Android features for **global QSR clients** (e.g., McDonald's, Taco Bell), enhancing in-app ordering flow, responsiveness, and session reliability.
- Collaborated with cross-functional teams to build modular, reusable components using **LEGO architecture**, accelerating time-to-market and simplifying feature maintenance.
- Refactored legacy codebase to improve app performance across Android devices and OS versions, reducing crash rates and improving load speed by **~20%**.
- Supported production monitoring using **Firebase, Crashlytics** to track identify issues, and optimize post-release stability.
